

Output Options

A variety of output options to meet every need

The modular concept behind the EFI Colorproof XF enables you to customize the solution to your existing output devices and workflow. It is possible both to control various printers and to export files for various different purposes, meaning there really are no limits when it comes to meeting your requirements.

Printer Option M, XL and XXL

Colorproof XF supports a variety of output devices such as inkjet, LED and laser printers. Three options are available depending on the printer size:

- Printer Option M:
For A3/A2 printers with a printing width of 18"
- Printer Option XL:
For printers with a printing width of 19" to 24"
- Printer Option XXL:
For printers with a printing width over 25"

The basic package comprises a Printer Option M that can be enhanced by additional Printer Option at any time, thereby enabling you to control a variety of printers centrally from your Colorproof XF.

File Export Option

Prepare your data for specific print conditions and output a colour-corrected TIFF file to ensure optimum output quality. When it comes to obtaining approval from your customers, you can export bitmap PDFs that are reproduced in the same way on all systems, thereby facilitating fast and effective binding approvals.

Fiery Option

The EFI Colorproof XF Fiery Option enables you to leverage two pioneering technologies from EFI. The solution combines the tried-and-tested colour quality and consistency of Bestcolor Technology with the exceptional performance and speed of Fiery controllers and servers. Benefit from the flexibility of a multifunctional printer pool for content and contract proofs, and digital print production.

Please refer to the Fiery Option data sheet for further information.

Gravure Option

The Gravure Option offers customers a cost-effective digital engraving solution. Separated greyscale TIFFs which have been output can be used to engrave gravure cylinders, thus closing the gap between design and the electromechanical engraving system.

Colorproof XF™

GRAPHIC ARTS SOLUTIONS

EFI's portfolio of integrated solutions increases productivity and improves your bottom line. Find out more at www.efi.com.
